

MICHAEL GEORGE

Seattle, Washington | 253 455 0565 | michael.george@tuta.io

Inquisitive Front-End Web Developer with a passion for creating performant and beautiful sites. I enjoy continuing to learn and expanding my skills by staying up to date with the latest front-end frameworks and libraries.

SKILLS AND QUALIFICATIONS

JavaScript	TypeScript	Cross Browser Testing
Node.js	Storybook	Git Version Control
React	Technical Writing	CI / CD
NextJS	Web Hosting	Strapi CMS

WORK HISTORY

SEPT. 2019 - PRESENT **HOSTWINDS – TUKWILA, WA**
Lead Front-End Developer

- Wrote React code that was used in combination with NextJS to statically generate various community pages and the marketing site.
- Created detailed documentation of systems.
- Setup various webpack configurations, performing upgrades as necessary.
- Wrote a scalable automated CI / CD framework for Google lighthouse, HTML validation, and cross-browser testing modules through Gitlab CE.
- Integrated third-party services BrowserStack, Algolia search, and CopyScape plagiarism detection.
- Implemented an asset processing pipeline to convert and optimize files for use with React.
- Utilized APIs using JSON REST based interfaces.

NOV. 2017 – SEPT. 2019 **HOSTWINDS – TUKWILA, WA**
Front Line Tech Support

- Provided tech support for DNS and web server-related issues via Live Chat and phone support.
- Used SSH and RDP for remote access in Linux and Windows servers.
- Assisted with backups and restorations for online servers.
- Wrote weekly client-facing Knowledge Base Guides.
